Workshop Agenda:
How to Achieve 90% Microsoft Teams Adoption in Three Months

Time	Session
8.30 - 9.00	**Registration and Breakfast**
9.00 - 9.45	**Let's brainstorm! What are you challenges in your digital transformation journey with Microsoft Teams**
9.45 - 10.30	**Modern Teamwork: Transform Collaboration and Communications with Microsoft Teams**
	We've seen the impact teamwork has had in our world. But what if teams could achieve even more? With Microsoft Teams, dux will share how it can help teams work better together, communicate and collaborate more dynamically, and ultimately, accomplish results faster.
10.30 - 10.45	**Coffee Break**
10.45 - 12.00	**Guide to achieving 90% Microsoft Teams adoption in three months, from CEO to Firstline workers**
	With all the integrated communication, knowledge management and collaboration it provides, Microsoft Teams is THE hub for teamwork in Office 365. But if that's the case, why is your organisation's user adoption rate so much lower than it is for Outlook?
	The truth is email is ingrained and changing user habits is difficult. Studies show that only about 34 percent of users are willing to use new technology rollouts within the enterprise.
	In this interactive session we will share practical guidance on how you can increase Microsoft Teams adoption across your entire organisation.
12.00 - 13:00	**Helping users do the right thing! How to Right Size Governance for Microsoft Teams in your organisation**
	You have successfully deployed Microsoft Teams across your organisation and now adoption is a top priority. But without guidance, users will quickly make your collaboration space an unorganised mess and adoption will be impeded.
	Save users in distress and win the day by making governance your ally in your fight against content sprawl!
	Join Dux as he discusses how to:
	• Avoid sprawl and remove any IT bottlenecks in delivering collaborative workspaces back to the business users
	• Give your users the option to be independent and self-serve needs at work while enabling them to do the right thing without slowing down their day to day productivity
	• Minimise risk to the organisation by implementing an automated governed approach to the lifecycle of documents and workspaces.
13:00 - 14:00	**Lunch**

Meet Our Speakers
